DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

A two and a half story, five bay structure, this flat-roofed building in running-bond brick is situated in mid-block.

The right ~~x~~ two first floor bays contain a large garage door capped by a flat stone lintel with panelled corner blocks extending to either side. A three-centered stone arch with panelled keystone and brick tympanum rises from the lintel, resting on the corner blocks. The second and third ground floor bays feature a coupled window (each double-hung with 1/1 lights), resting on a stone sill and spanned by a splayed stone flat-arched lintel, also with panelled keystone. Below, a stepped panel recedes down to the sidewalk level. The far left bay houses a flat-transomed door under a flat stone lintel with corner blocks extending to either side. Above this bay is a recessed brick panel; above the coupled window, a larger one.

Each upper story bay (with the exception of the far left) contains a double-hung (1/1 lights) window, with stone sill below and splayed flat-arched stone lintel above. The far left bay is differentiated by a slightly projecting, bevelled brick balcony. A brick string course, bracketed wooden cornice, and stepped brick parapet with centered chimney characterize the upper facade.
